Welcome to the Trauma and Orthopaedic Outpatient Department at Salisbury District Hospital.

There are eight Orthopaedic Consultants, their clinics are listed below.

**Orthopaedic Clinic**

Each consultant holds a weekly Orthopaedic clinic. Both Mr Chapple and Mr Dabke hold a spinal clinic each week, with two local GPs helping them.

It is possible you may not be seen by the consultant at each visit, but you will be seen by a member of his team. The names of the doctors that are in clinic are written on the notice board in the waiting area.

Please report to the reception desk when you arrive. All patients are seen in order of their appointment time. You may need an X-ray before seeing the doctor. If this is the case the reception staff will give you an X-ray card.

If you have had any scans or X-rays from another hospital (in relation to your current condition) please bring these with you.

Sometimes the doctor or nurse in the clinic may be called to an emergency which may delay the clinic. Any delays will be written on the information board or displayed on the TV screen in the waiting area.

If the clinic is running late you can leave the department for refreshments. The reception staff will give you a pager which will alert you when to return to the department.
